**You could lose money by investing in the Fund. Although the Fund seeks to preserve the value of your investment at \$1.00 per share, it cannot guarantee it will do so. The Fund may impose a fee upon the sale of your shares or may temporarily suspend your ability to sell shares if the Fund's liquidity falls below required minimums because of market conditions or other factors. An investment in the Fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. The Fund's sponsor has no legal obligation to provide financial support to the Fund, and you should not expect that the sponsor will provide financial support to the Fund at any time.**

**Credit Risk-** A bond's credit rating reflects the issuer's ability to make timely payments of interest or principal—the lower the rating, the higher the risk of default. If the issuer's financial strength deteriorates, the issuer's rating may be lowered and the bond's value may decline.

**Liquidity Risk -** The difficulty of purchasing or selling a security at an advantageous time or price.

**Foreign (non US) Risk -** Non-US securities may be more volatile because of political, regulatory, market and economic uncertainties associated with such securities.

Fluctuations in currency exchange risk may negatively affect the value of the investment or reduce returns. These risks are magnified in emerging or developing markets.

**Interest Rate Risk** - As interest rates rise, bond prices fall and vice versa - long-term securities tend to rise and fall more than short-term securities.
